The best of Switzerland - Mountains, Lakes, Glaciers & Waterfalls

Enjoy the natural beauty of the Swiss Lakes and Mountains; relax on lake cruises, travel the world's steepest cog railway and marvel at amazing scenery as this tour takes you through the heart of Switzerland and the very best of its Alpine scenery.

Our first Campsite in Switzerland is situated on the shores of Lake Lucerne. Here you are within walking distance of the city, which ranks amongst the world's prettiest and is rich in sights and attractions. The Lake forms a complex shape reaching from the center of Lucerne into the mountains.

From here we travel on the dramatic journey towards Lugano via the Gottard Tunnel, or if you prefer, travel over the Pass. Lake Lugano is a glacial lake at the southernmost tip of Switzerland, in the Ticino holiday region sitting south of the Alps ridge.

Moving on to the upper Rhone Valley we spend time in Raron and from our campsite we have numerous sightseeing possibilities, including an opportunity to visit the Aletsch Glacier, the largest in the Alps. Continuing along the River Rhone we arrive to Martigny, nestled in an elbow on the river among vineyards and orchards. The cultural capital of the Valais Canton, Martigny is home to the Museum of St Bernard Hospice and the legendary dogs. During our stay, we travel on the Mont Blanc Express train for an amazing journey through the Trient Gorge.

Le Landeron in the Three-Lake region close to the Jura Mountains is our next destination. Here, whilst exploring the wonderful scenery of the area, you also have the opportunity to visit the old town of Neuchatel, take a boat trip across Lake Neuchatel and visit the Watch Museum in Le Locle.

Our final destination sees us reach Lauterbrunnen, in the Bernese Oberland. Our campsite lies below the Staubbach waterfall in the Valley of the 72 Waterfalls and within sight of the Eiger and the Mönch. Here we travel on the iconic train journey through the Bernese Alps to the Jungfrauoch, the highest train station in Europe, stopping off at the North Face of the Eiger, to take in the spectacular views of the High-Alpine wonderland of ice, snow and rock
